Raw materials
European Innovation Partnership (EIP)

The supply of raw materials, the lifeblood of today's high-tech industry, is increasingly under pressure. With a view to increasing the availability of raw materials for Europe, the European Commission has proposed a European Innovation Partnership on raw materials.

Innovation can be a powerful vehicle in meeting Europe's challenges in the field of raw materials. For example, new technologies can help to extract deeper, in more remote areas and under harsh conditions.

Action is also needed to develop substitutes for critical raw materials and to improve recycling of, among others, the 17 kg electric and electronic equipment waste that each EU citizen produces annually today.

The current situation calls for targeted innovation and research efforts, breakthrough technologies and multidisciplinary approaches, as well as demand-side interventions (e.g. standards, public procurement, regulatory measures).

The Innovation Partnership brings together, among others, EU countries, companies, researchers and NGOs to promote innovative solutions to Europe's raw materials challenge.

EIP de Materias Primas

ÁMBITO: minerales, metales, minerales metálicos, madera, caucho natural, papel y potencialmente algunos químicos (ver el *Strategic Implementation Plan*) (El ámbito no sólo cubre las materias primas críticas para la industria).

Metrics for Monitoring the Performance of the EIP on Raw Materials:

1. Import Dependency
2. Resource Efficiency
3. Competitiveness

Ponderación anual mundial

Table 1: Metrics for EU Import Dependency of Raw Materials (%)

Raw Material	Import Dependency	Raw Material	Import Dependency
Natural Rubber	100%	Bulk Metals	57%
High-Tech Metals	96%	Industrial Minerals	46%
Iron Ore	85%	Wood	15%
Critical Raw Materials*	77%	Paper	9%

* As defined by the EU. These 14 raw materials include a combination of high-tech metals, bulk metals, as well as industrial minerals

EIP de Materias Primas

Raw material	Emerging technologies
■ Antimonio	Óxido Antimonio-Zinc (~ In-Sn-O), microcondensadores
Cobalto	Baterías de ión-Litio, combustibles sintéticos
Galio	Semi-conductores, células fotovoltaicas de lámina delgada, LEDs blancos
Germanio	Fibra óptica, tecnologías ópticas
Indio	Pantallas, células fotovoltaicas de lámina delgada
Platino (PGM)	Células de combustible, catalizadores
Paladio (PGM)	Catalizadores, desaladoras
Niobio	Microcondensadores, aleaciones férricas
Neodimio(REE)	Imanes permanentes, tecnologías laser
Tántalo	Microcondensadores, tecnologías médicas

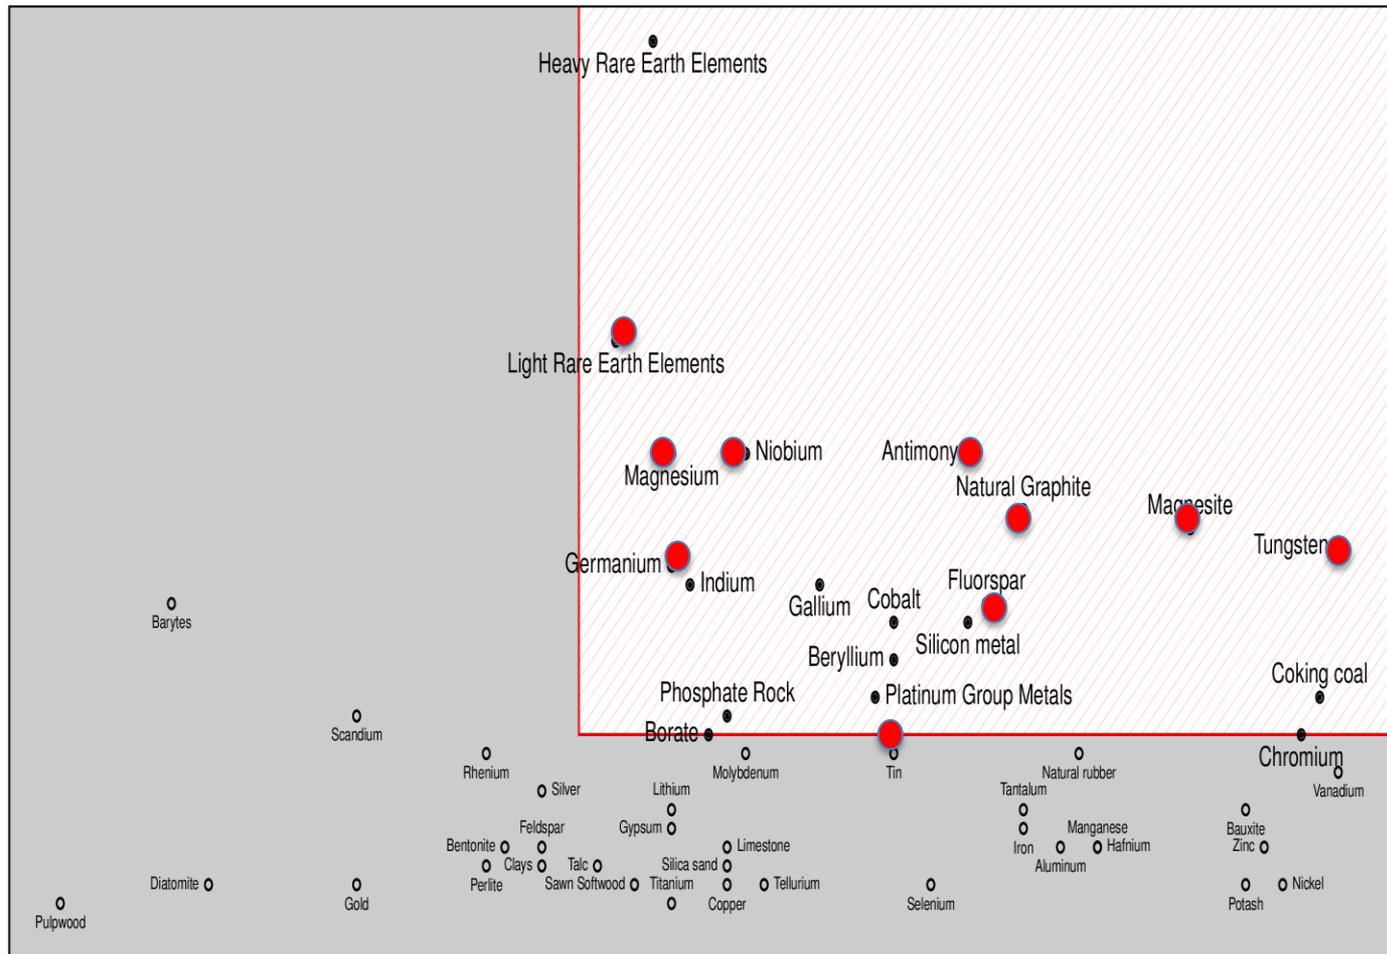

20 Materias Primas Críticas

Abril de 2014:

- *“The European Commission presented today a revised list of Critical Raw Materials. The 2014 list includes 13 of the 14 materials identified in the previous list of 2011, with only **tantalum moving out of the list (due to a lower supply risk)**. Six new materials appear on the list: **borates, chromium, coking coal, magnesite, phosphate rock and silicon metal** bringing the number up to 20 raw materials which are now considered critical by the European Commission. The other 14 raw materials are: **antimony, beryllium, cobalt, fluorspar, gallium, germanium, indium, magnesium, natural graphite, niobium, platinum group metals, heavy rare earths, light rare earths and tungsten (MEMO/14/377)**”*

RIESGO DE SUMINISTRO

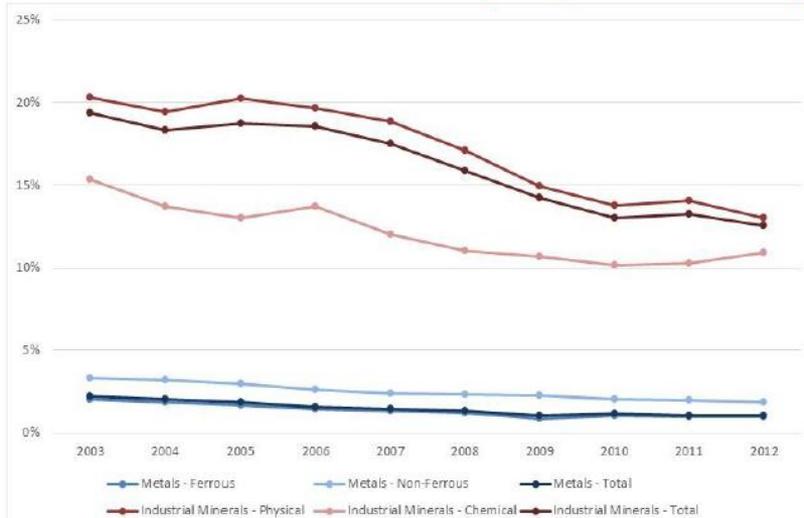

IMPORTANCIA ECONÓMICA

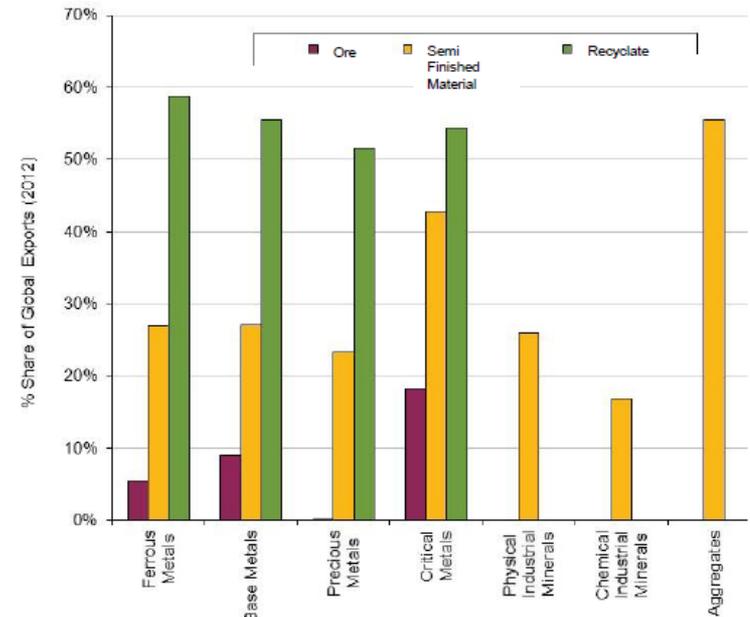

Estudio de EUNOMIA

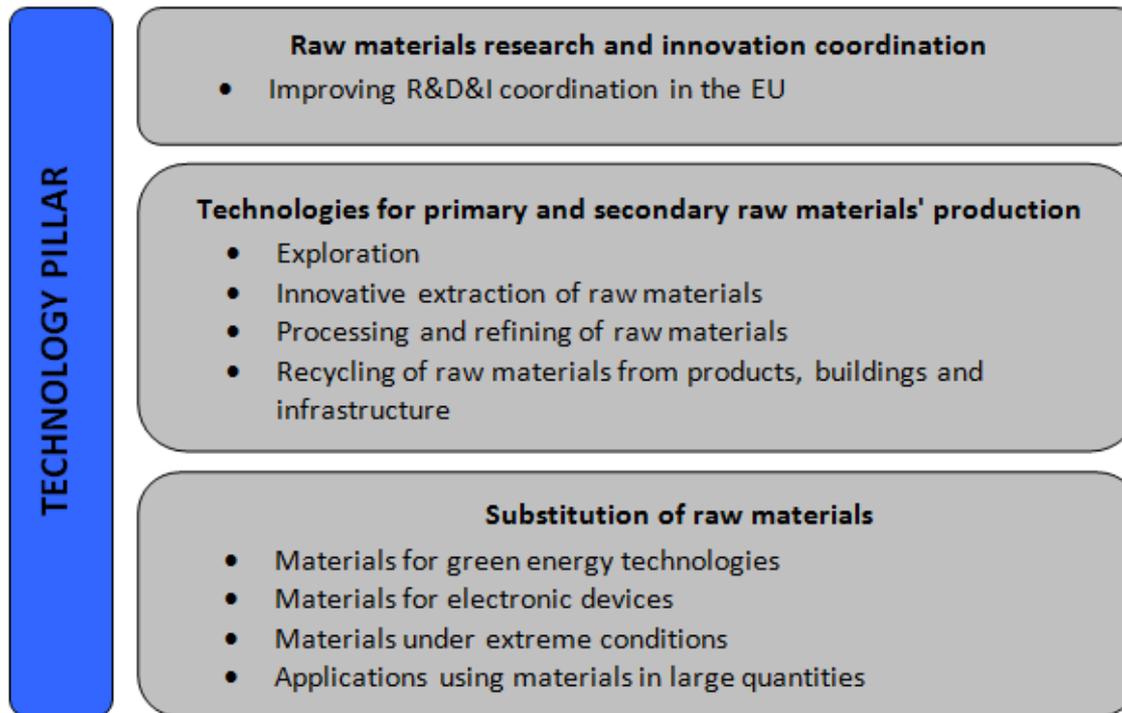

• EU28 Share of Global Output (2003 – 2012)

Raw Materials Scoreboard

- **Discussion paper:** November 2014
 - List of possible indicators + assessment
 - Outline, thematic clusters and logical narrative
 - Data gaps and how to fill them
 - Recommendations for the longer term
- **Draft Scoreboard:** April 2015
- **Draft final Scoreboard** to be presented to Sherpa Group meeting **July 2015**

Actividad internacional

Workshop: best practices on mining policies

Timing: June 2014

Will include technologies

Participants: EU, Canada, Australia, Chile, South Africa, US,
(now extended to Peru, Mexico and Brazil)

Exchange of best practices in areas of joint expertise

- mining technologies and techniques
- permitting process
- land-use planning
- treatment of mining waste + other environmentally friendly solutions in mining

Actividad internacional

EU - Greenland workshop

Timing: 2nd week of September 2014

Follow up on dialogue established on EU-Greenland cooperation on Raw Materials

3 meetings foreseen:

- Internal: between government of Greenland and Commission
- a workshop with mining companies, EU end-users and suppliers, and Greenlandic providers of mining support services.
- Meeting with Gov. of Greenland and Bureau of Minerals and Petroleum responsible for licencing of mining operations

Actividad internacional

EU - African Union workshop

Timing: late October 2014

Part of Joint Africa-EU strategy foreseeing actions on Raw Materials

Focus on infrastructure development

Areas:

- governance
- Investment and infrastructure
- Geological knowledge and skills

Actividad internacional

EU – US - Japan workshop on Critical Raw Materials– 2 December 2013

Part of the Raw Materials Work Plan agreed by Transatlantic Economic Council

Purpose: feed in the review of critical raw materials list

- Exchange of information

- Compare analysis and data

- Discuss progress on joint data inventory

Actividad internacional

EU - Latin American dialogue on Raw Materials, Lima, Peru, 10-11 March 2014

Including: Peru, Colombia, Brazil, Chile, Uruguay, Mexico, Argentina

Discuss:

- how to enhance cooperation at regional and bilateral levels
- exchange of best practices

List of published commitments

[↪ ECAS Login](#)

[+ Create An ECAS Account](#)

A commitment is a joint undertaking by several partners, who commit to activities aimed at achieving the EIP's objectives between 2014 and 2020. Commitments must aim to deliver innovative products, processes, services, technologies, business models or ideas that can be brought to the market or that would bring wider societal benefits.

The EIP's commitments are essential to achieve the objectives set out in the EIP's Strategic Implementation Plan ([Part 1](#)) [Part 2](#)). These commitments aim to foster partnerships and the sharing of knowledge between actors (industry, public services, academia etc).

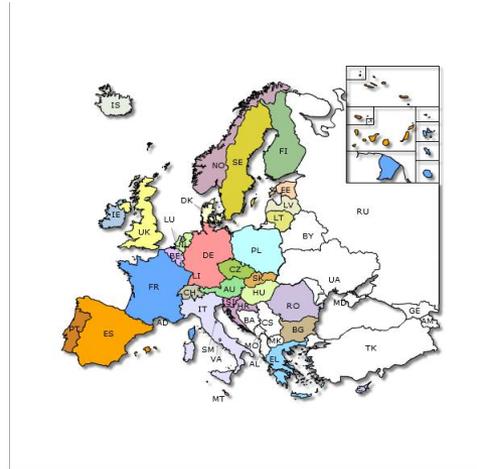

In October 2013 the EIP launched a call for commitments. Following this, the EIP's Sherpa Group, on behalf of the High Level Steering Group, confirmed that 80 commitments fulfilled the required criteria. These commitments are now recognised as "Raw Material Commitments" and are published on this webpage.

New calls for commitments are scheduled for 2015, 2017 and 2019.

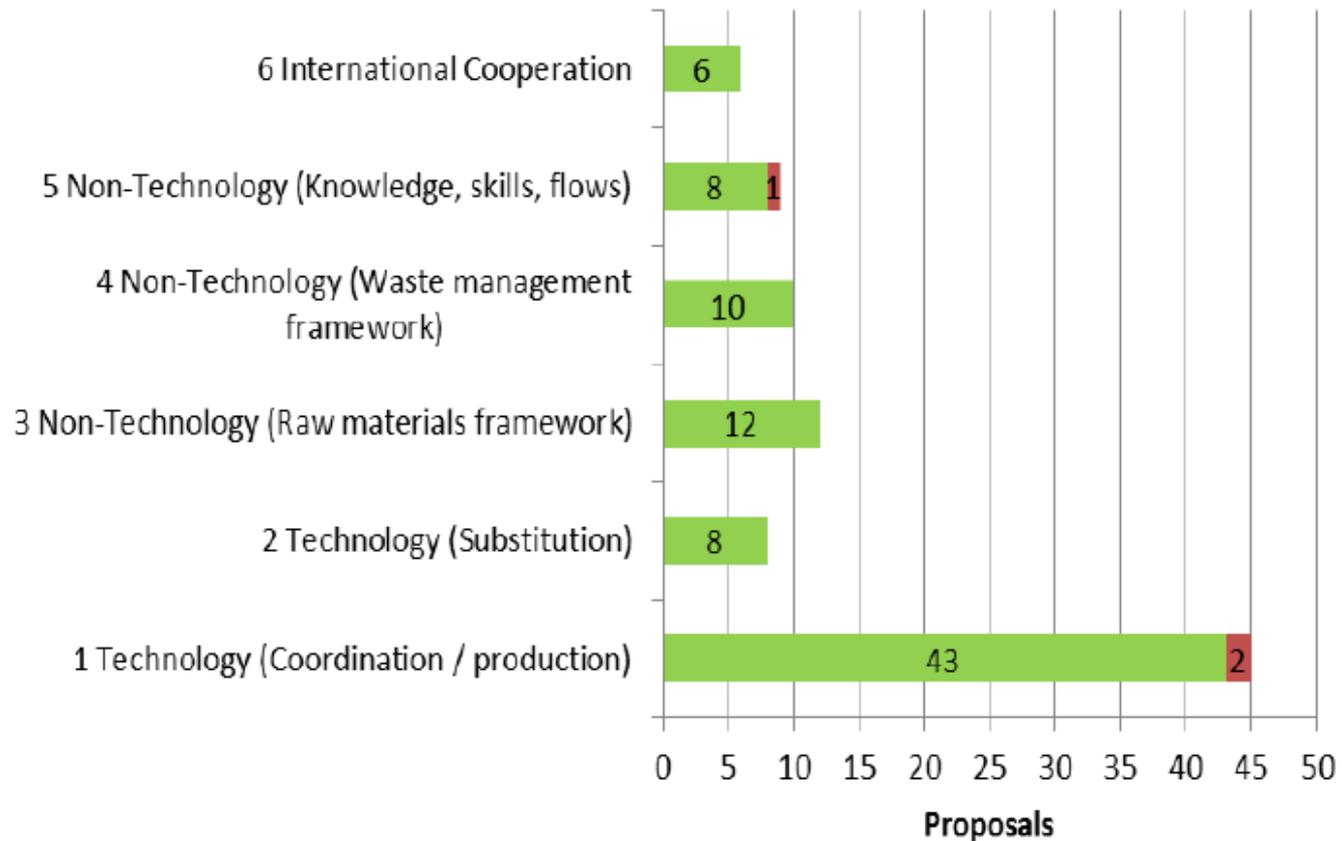

[Find more information on the 2013 call for commitments](#)

Participación española en commitments

- **Resultado de la 1ª *Call for Commitments*.** Los resultados son extraordinarios por parte española tanto en participación como en aprobación de *commitments*. España ocupa la **primera posición** de Europa en participantes (139 de 881) y la **segunda en coordinación** a nivel de país (10 de 90, Francia coordina 17 y otras entidades europeas 14). Se han presentado 90 *commitments*; de los cuáles **SE APRUEBAN 80**. El presupuesto total contabilizado en las propuestas de *commitments* asciende a 1.897 M EUR.

Resultados Call for Commitments

Capacidades españolas

España es un país de **gran tradición minera y forestal** que ha contado desde siempre con explotaciones para la obtención de muy diversas sustancias. Algunos ejemplos son :

- **Yeso** – sexto productor mundial (el tercero como exportador)
- **Fluorita** – España ocupa el sexto puesto en producción.
- **Celestina** (mineral de estroncio) – segundo productor del mundo (y único en Europa)
- **Magnesita** – quinto productor mundial y el tercero en Europa.
- **Roca ornamental** – España ocupa el séptimo puesto a nivel mundial y el segundo en Europa con una producción de 4 M T /año.

España ocupa el séptimo lugar en producción de Piedra Natural detrás de China, India, Turquía, Irán, Italia y Brasil; y el segundo puesto a nivel europeo.

En el caso de **materias primas metálicas y minerales metálicos**, en relación a Europa ocupamos los siguientes puestos:

- **Cinc**, sexta en mineral, en producción de metal somos los primeros de Europa (la mayor fábrica está en San Juan de Nieva, Avilés).
- **Cobre**, quinta en mineral y cuarta en metal.
- **Wolframio**, somos el tercer país productor de Europa (además sólo producimos tres países en Europa).
- **Estaño**, somos los segundos, tras Portugal, (somos los únicos productores en Europa).
- **Oro**, ocupamos la posición quinta.
- **Plata**, ocupamos la posición octava.

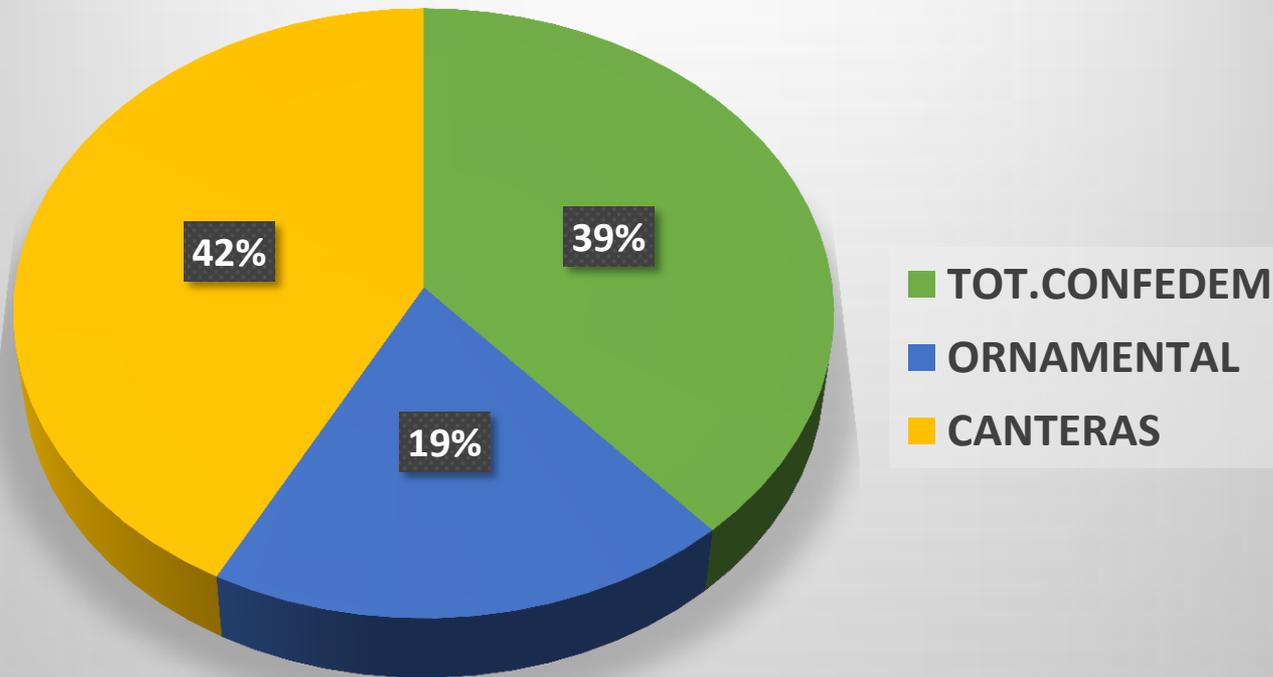

A finales del **siglo XIX y primer tercio del siglo XX** se vivió una época dorada de la **minería metálica**, centrada en la producción de cobre, pirita y mineral de hierro. Durante la década de 1980 a 1990, con la entrada en producción a nivel mundial de nuevos yacimientos metálicos, se hizo inviable la supervivencia de empresas mineras y minas de gran tradición, que condujeron al cierre de un gran número de explotaciones. En la **década de 1990** cuando se produce un **cambio importante de la estructura de la industria extractiva en España** con un fuerte crecimiento en el ámbito de las **rocas ornamentales, minerales industriales o productos de cantera**, algunos de ellos con una intensa actividad exportadora que **han permitido mantener la importancia histórica del sector minero en España. Actualmente, el alto precio de las materias primas está propiciando un repunte de la minería metálica** con la apertura de antiguas explotaciones y una intensa actividad en investigación e innovación.

Capacidades españolas

- ❑ La Ind.Extractiva en España HOY. CONFEDEM en cifras (2012)
 - ❑ Más de 2.200 M€ de producción minera (62%)
 - ❑ Más de 12.000 empleos directos
- ❑ Capacidad técnica, formación, experiencia de los equipos humanos a nivel mundial (trabajando en los cinco continentes)
- ❑ Tecnología propia, de reconocido prestigio, particularmente en Sostenibilidad, desarrollada en nuestras Universidades y Centros Tecnológicos.

Capacidades españolas

EMPLEO POR ACTIVIDAD EXTRACTIVA

Situación Empleo directo en 2012 (durante 2013 y 2014 se ha incrementado):

Valoraciones comparativas

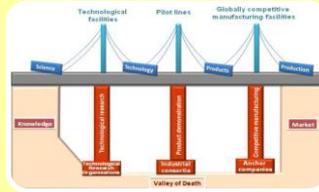

Materias primas	Principales productores (2010, 2011, 2012)	Principales fuentes de importación en la UE (esencialmente 2012)	Índice de sustituibilidad*	Índice de aporte al reciclado al final de su vida útil**
Antimonio (estibina)	China 86 %	China 92 % (en bruto y en polvo)	0,62	11 %
	Bolivia 3 %	Vietnam 3 % (en bruto y en polvo)		
	Tayikistán 3 %	Kirguistán 2 % (en bruto y en polvo); Rusia 2 % (en bruto y en polvo)		
Berilio	Estados Unidos 90 %	Estados Unidos, China y Mozambique ⁴	0,85	19 %
	China 9 %			
	Mozambique 1 %			
Boratos	Turquía 41 %	Turquía 98 % (boratos naturales) y 86 % (boratos refinados)	0,88	0 %
	Estados Unidos 33 %	Estados Unidos 6 %, Perú 2 % (boratos refinados); Argentina 2 % (boratos naturales)		
Carbón de coque	China 53 %	Estados Unidos 41 %	0,68	0 %
	Australia 18 %	Australia 37 %		
	Rusia 8 %; Estados Unidos 8 %	Rusia 9 %		
Cobalto	República Democrática del Congo 56 % ↑	Rusia 96 % (minerales y concentrados de cobalto)	0,71	16 %

(*) El índice de sustituibilidad mide la dificultad para sustituir el material, calculada y ponderada para todas las aplicaciones. Los valores se sitúan entre 0 y 1, donde 1 indica la menor sustituibilidad.

(**) El índice de aporte al reciclado al final de la vida útil mide la proporción de metal y productos metálicos que se genera a partir de desechos al final de la vida útil, y otros residuos de bajo contenido de metales presentes en desechos al final de la vida útil en todo el mundo.

Convocatorias 2014

Commission

New solutions for sustainable production of raw materials

- Mining of small deposits and alternative mining (2014)
- Flexible processing technologies (2014)
- Recycling of raw materials from products and buildings (2014)

Innovative and sustainable solutions leading to substitution of raw materials

- Materials for electronic devices (2014)

Coordinating and supporting raw materials research and innovation

- Mineral deposits of public importance (2014)
- Secondary raw materials inventory (2014)
- Strategic international dialogues and co-operation on raw materials with technologically advanced countries (2014)

Convocatorias 2014

- 12 selected proposals with over 190 partners from 20 Member States and 8 non-EU countries.
- The private sector participation, including SMEs, is around 45% in terms of partners and 49% in funding.
- The outreach activities in the EIP should be intensified. Particular attention should be paid to the participation of EU13 Member States, which was weak in both the EIP Commitments and the proposals of H2020.
- Negotiation letters sent on 8 September 2014

Convocatorias 2014

- **Convocatorias en dos fases.** Presupuesto: 181 M EUR (62,6% de un presupuesto total de 289 M EUR para convocatorias 2014). Como resultados agregados, destaca un 20,7% de los coordinadores que pasan a segunda fase son españoles (24 propuestas de un total de 116). Destaca el posicionamiento español en las convocatorias WATER y WASTE, donde ocupamos las primeras posiciones en Europa.
 - El 75% de las propuestas españolas que pasan a segunda fase se encuadran en una sólo convocatoria focalizada en agua (WATER-2014 (2-stage topics)).
- **Convocatorias en una fase.** Presupuesto: 108 M EUR. WASTE, 15,7% de retorno español.

Convocatorias 2015

Commission

SPIRE 7-2015: Recovery technologies for metals and other minerals

- New approaches or alternative solutions for major cost-effective improvements in the efficiency of recovery operations for metals and other minerals, leading to waste reduction and minimising the environmental impact of industrial operations.
- Innovation actions, TRL 5-7, EUR 6 and 10 million

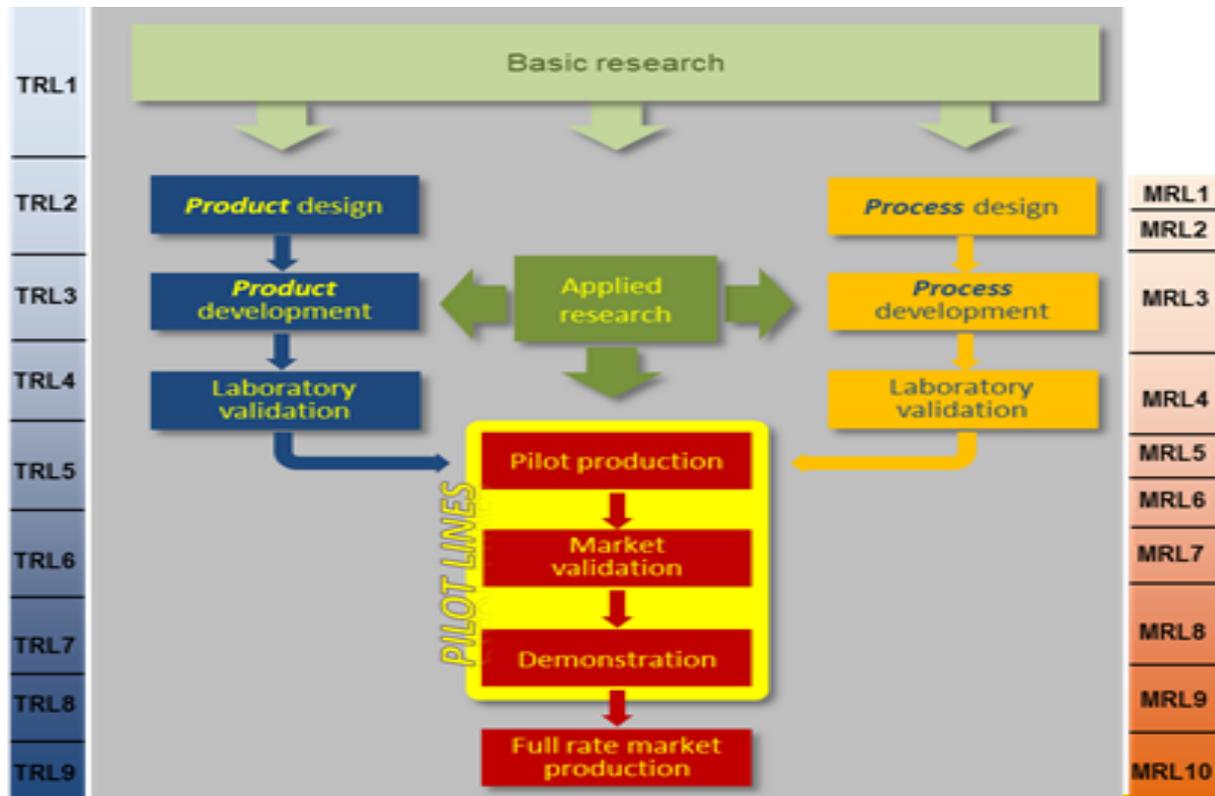

NMP 23 – 2015: Novel materials by design for substituting critical materials

- International cooperation, in particular with Japan and the United States of America
- Research and Innovation actions, TRL 3-4, EUR 3 and 5 million

Technology Readiness Level (TRLs)

Reto Social 5 – Programa de Trabajo 2016-2017

EJES PRINCIPALES

1. Systemic eco-innovation for a circular economy
2. Climate Services
3. Nature-based solutions
4. Raw Materials

Y... RIS3 «PRESCRIPTIVE»!

PRIORIDADES

- Earth Observation
- **Water**
- Cultural Heritage
- **The Artic**

Complementariedades y vínculos

- Knowledge Innovation Community on Raw Materials (EIT)
- PPP SPIRE
- ERA-Net ERAMIN
- CRM-Net

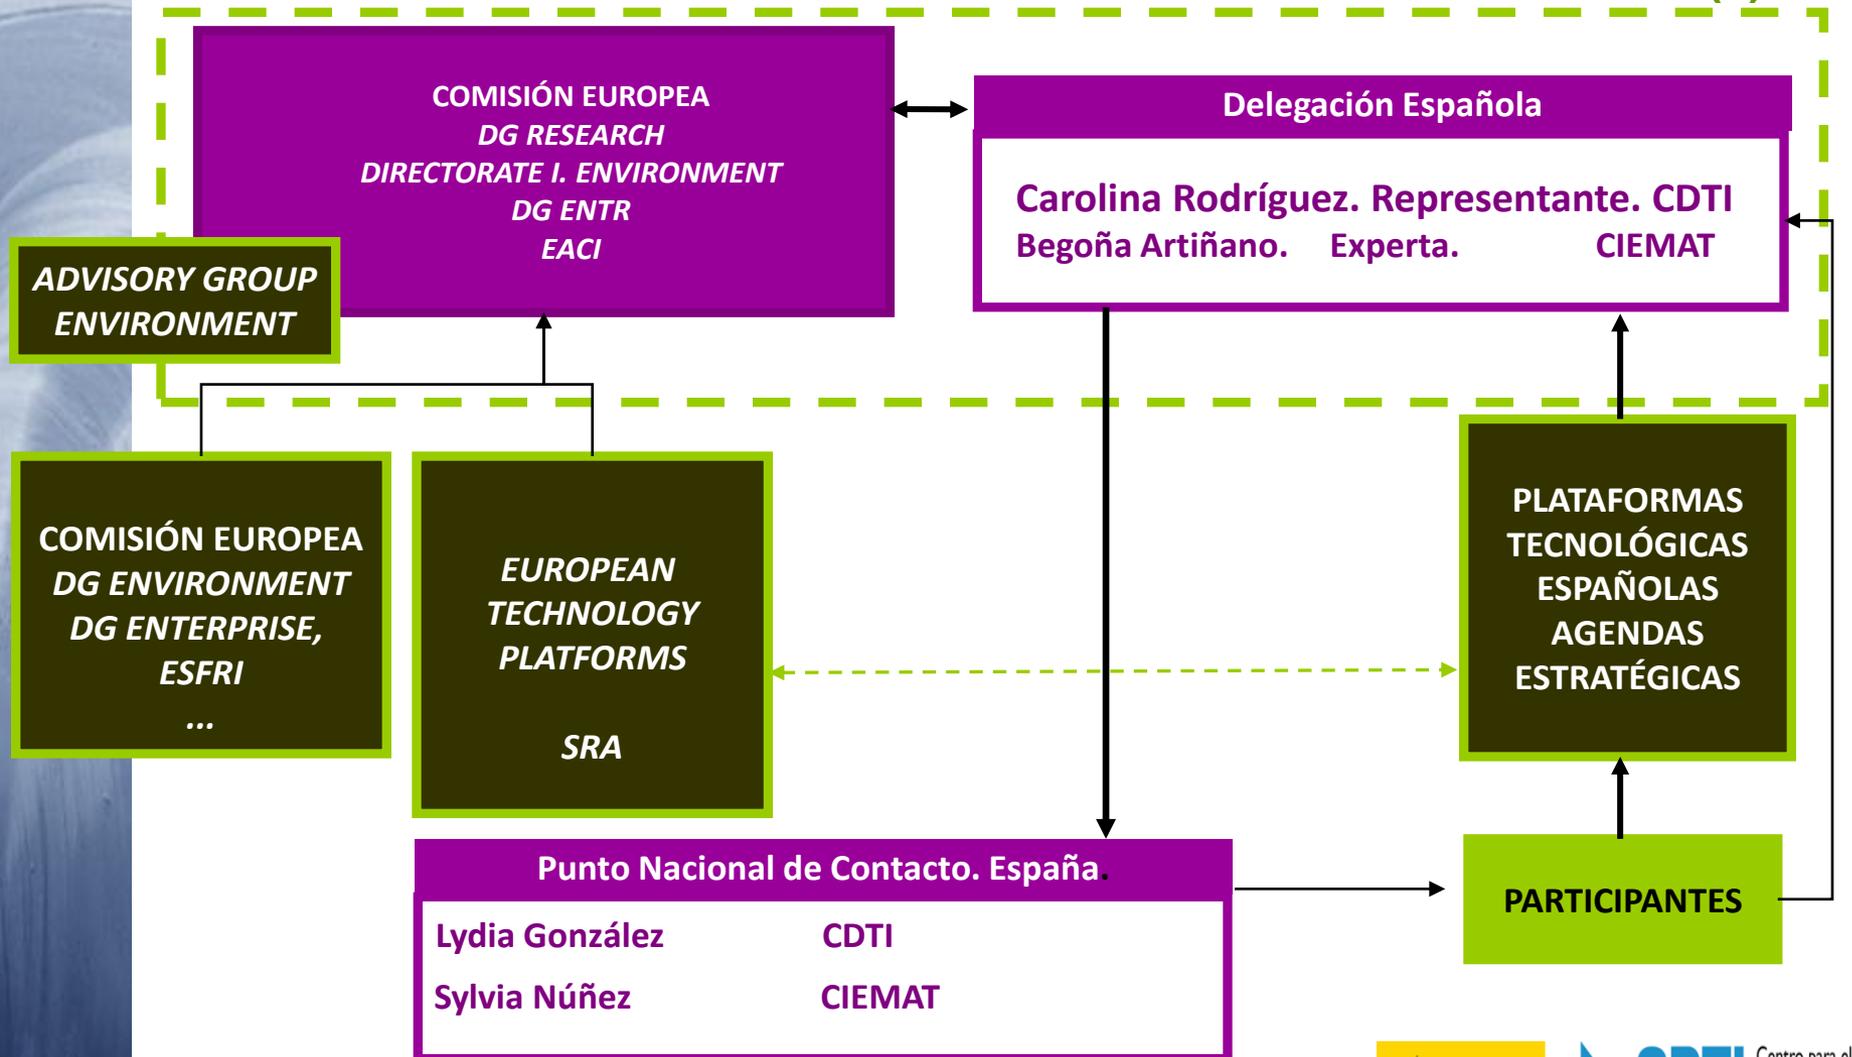

The image shows a screenshot of the ERA-MIN website and an EIT Monitoring diagram. The website screenshot includes a search bar, navigation links (news, about, members), and a main banner for 'Era-Min' with the text 'Research for innovative technologies and solutions for' and a list of goals: sustainable primary resources supply, sustainable secondary resources supply, and substitution of critical materials. Below the banner are sections for 'News' and 'focus'.

The EIT Monitoring diagram is titled 'EIT MONITORING' and is structured as follows:

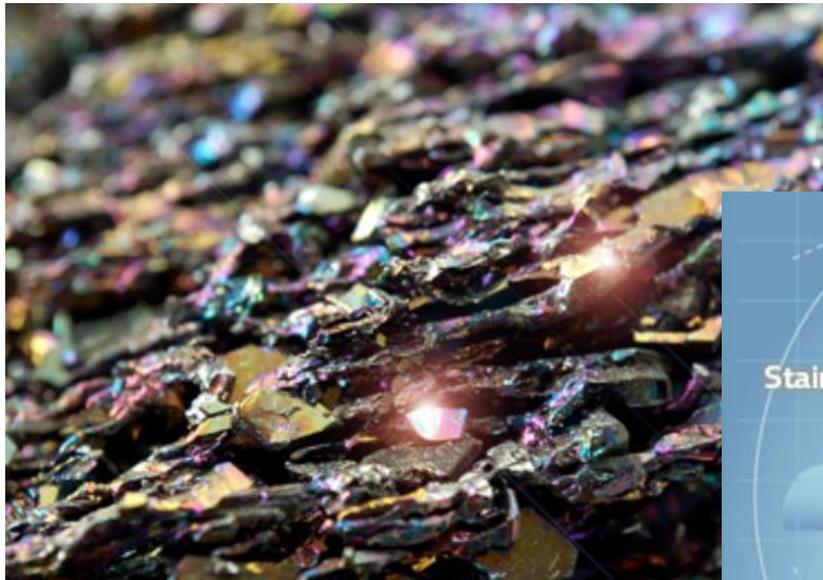

- Horizon 2020**: Interface to H2020 & Innovation Union
- EIT Specific Indicators (Institute)**: Indicators reflecting EIT organisational objectives such as operational excellence, dissemination and cross-KIC support
- Cross KIC Scoreboard (Core KPIs)**: Indicators reflecting the EIT strategic objectives and applying to all KICs
- EIT Performance Measurement System**: A central box receiving input from the EIT Specific Indicators and Cross KIC Scoreboard.
- KIC Specific Indicators**: Three categories: KIC 1 (Individual KPIs defined in Business Plans), KIC 2 (Individual KPIs defined in Business Plans), and KIC 3 (Individual KPIs defined in Business Plans).
