- I. Presentación ACR+
- II. Visión ACR+: Hacia la Economía Circular
- III. Ejemplos concretos de la Economía Circular
- IV. The Circular Europe Network

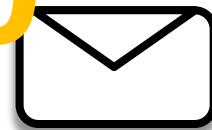

I. Presentación ACR+: En números

 **34** informes
publicados
desde 2004

 **13** running
EU-funded projects

 **20+**
años de
experiencia

ACR+
*Asociación de Ciudades y
Regiones por la gestión
sostenible de los Recursos*

40
boletines
por año

 **3** iniciativas
ACR+

I. Presentación ACR+: socios

 **87** socios

en **23** países 

 **51** Autoridades locales y regionales

 **+1,100** municipalidades representados

Algunos miembros:

II. Visión ACR+: Hacia la Economía Circular

De residuos a recursos

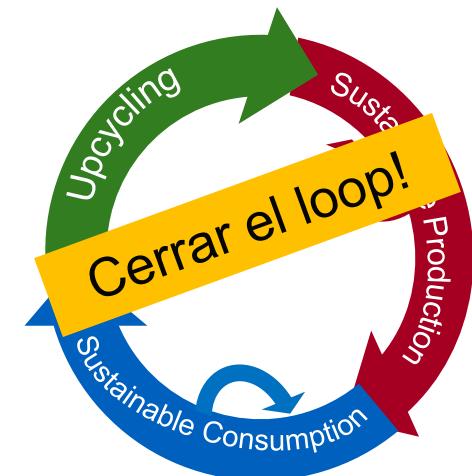

Economía linear

Economía de la cadena

Economía circular

De residuos a recursos

II. Visión ACR+: Hacia la Economía Circular

5 pilares para la economía circular

1. Jerarquía territorial
2. Enfoque Multi-R
3. El papel de los ARL
4. Gobierno compartido
5. Nuevos modelos de negocio

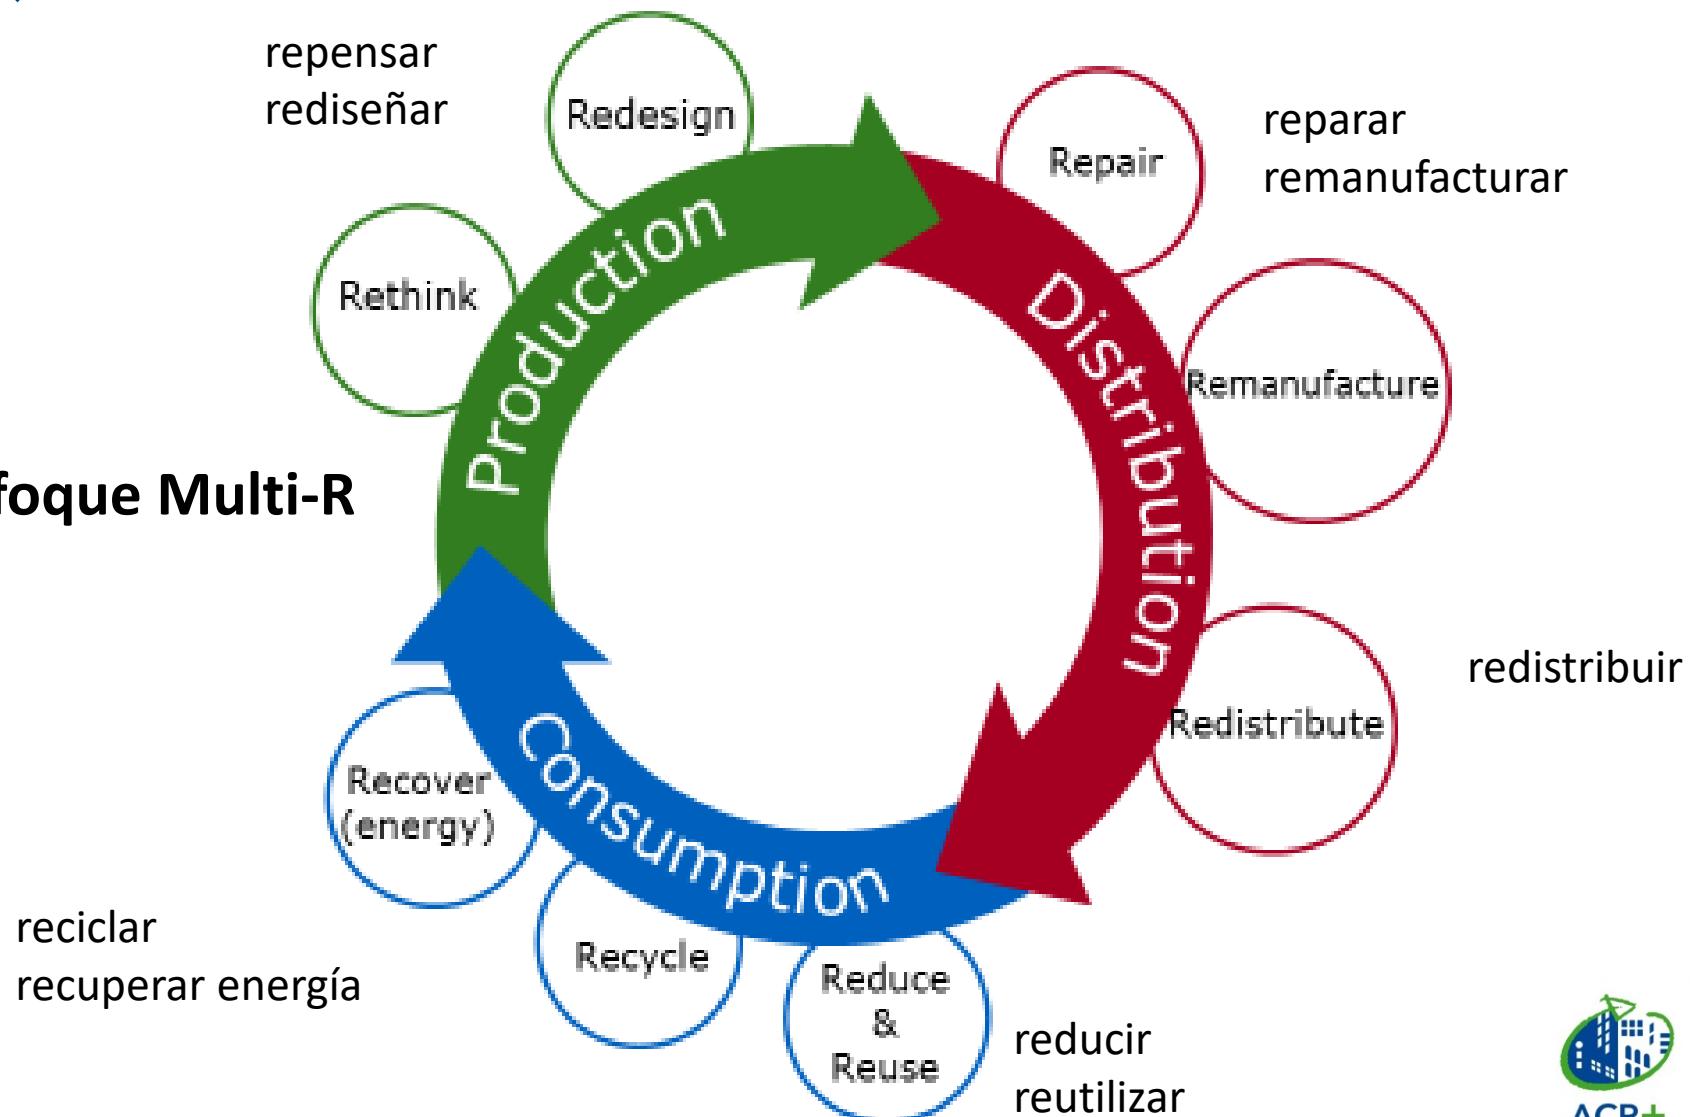

II. Visión ACR+: Hacia la Economía Circular

1. Jerarquía territorial

II. Visión ACR+: Hacia la Economía Circular

2. Enfoque Multi-R

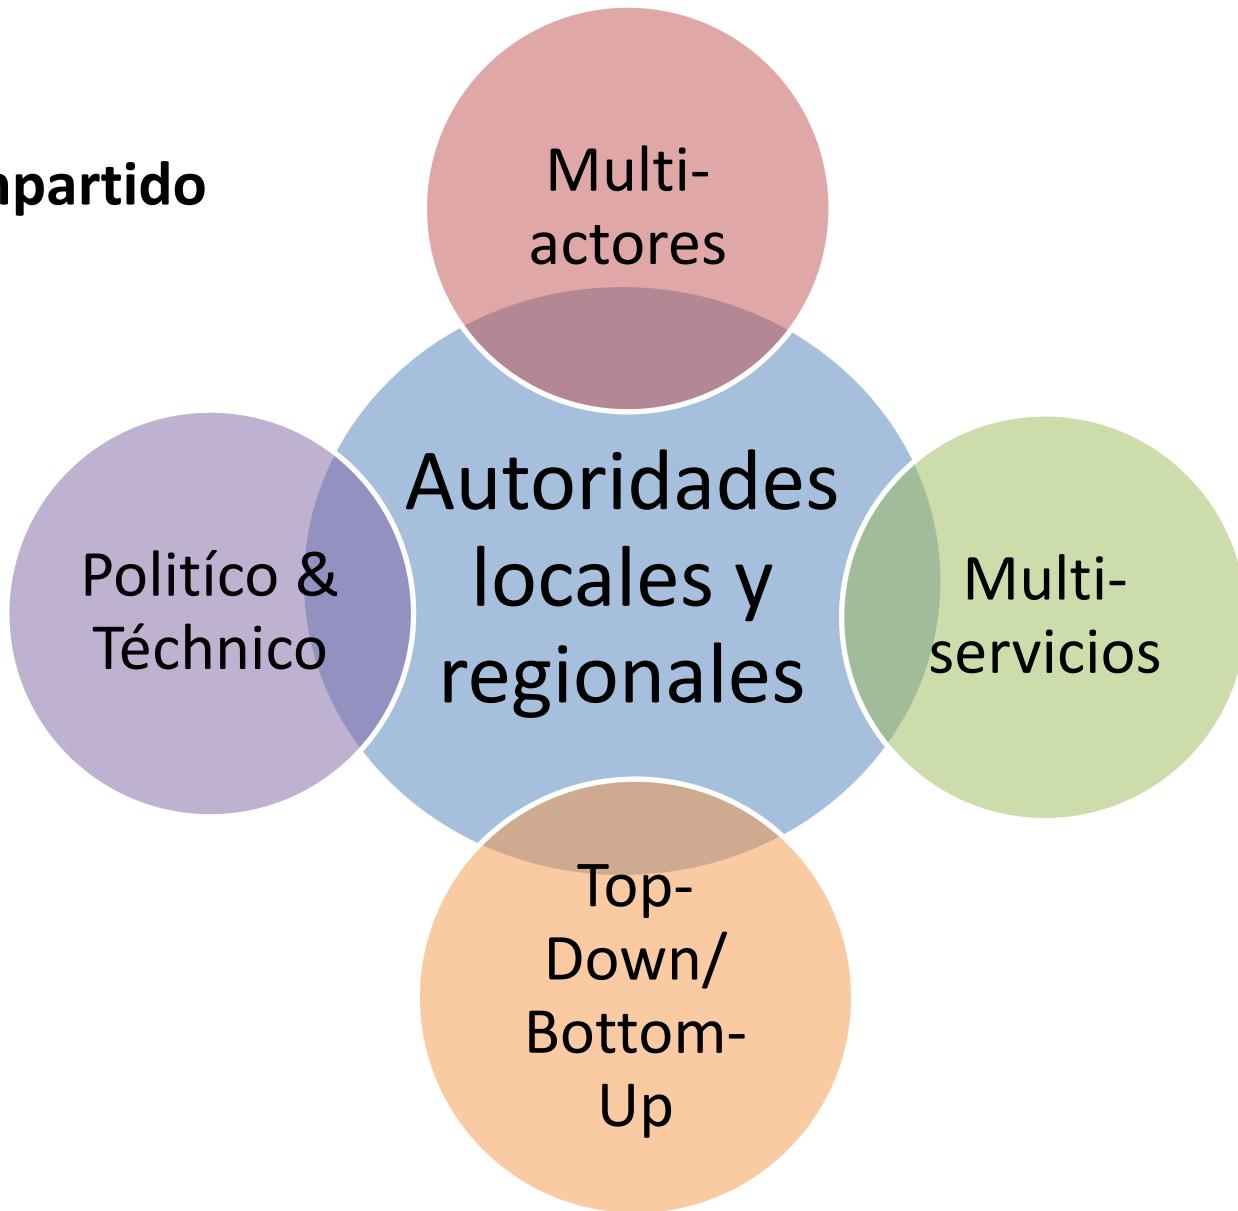

II. Visión ACR+: Hacia la Economía Circular

3. ARL en el centro de la economía circular

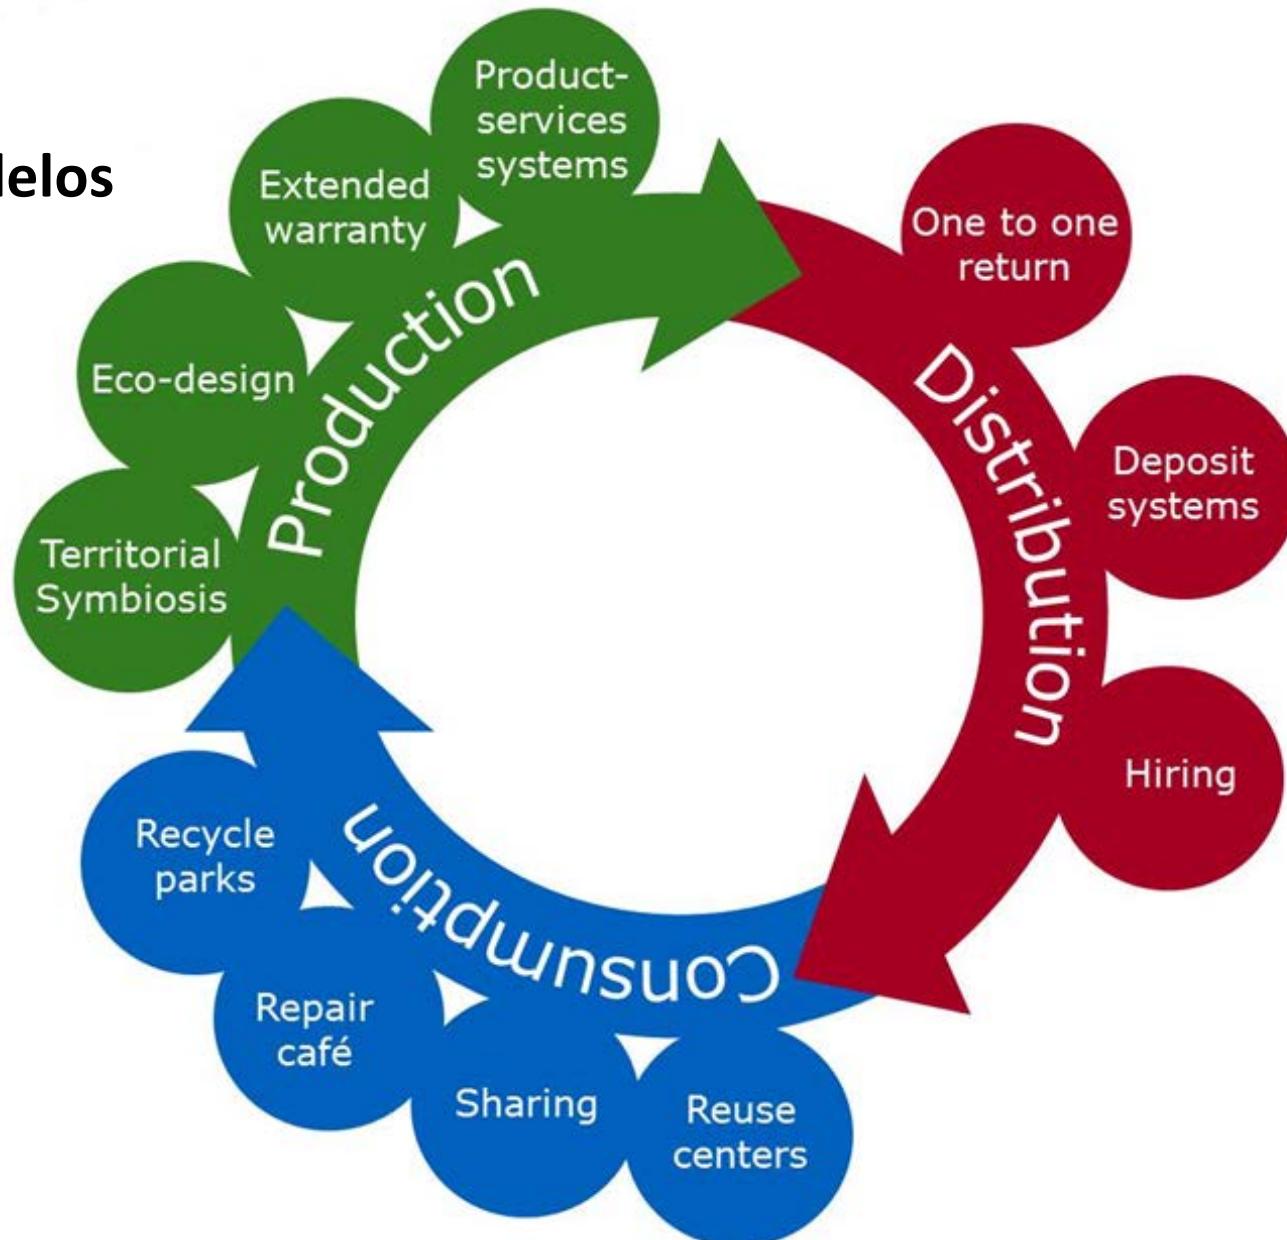

II. Visión ACR+: Hacia la Economía Circular

4. Gobierno compartido

II. Visión ACR+: Hacia la Economía Circular

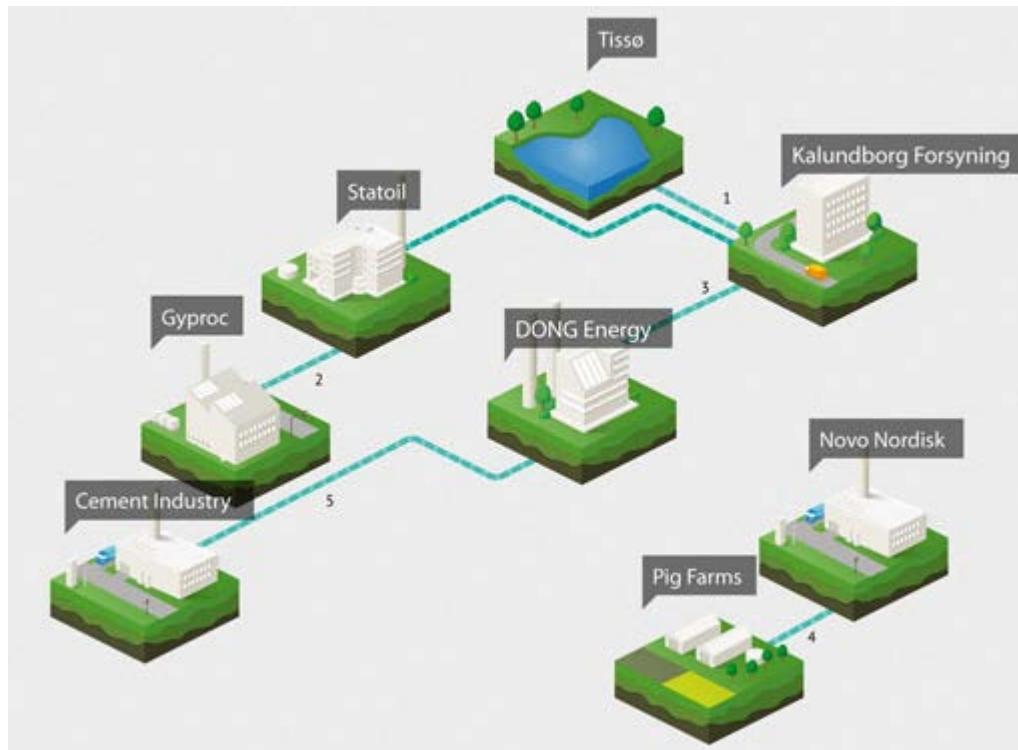

5. Nuevos modelos de negocio

III. Ejemplos concretos

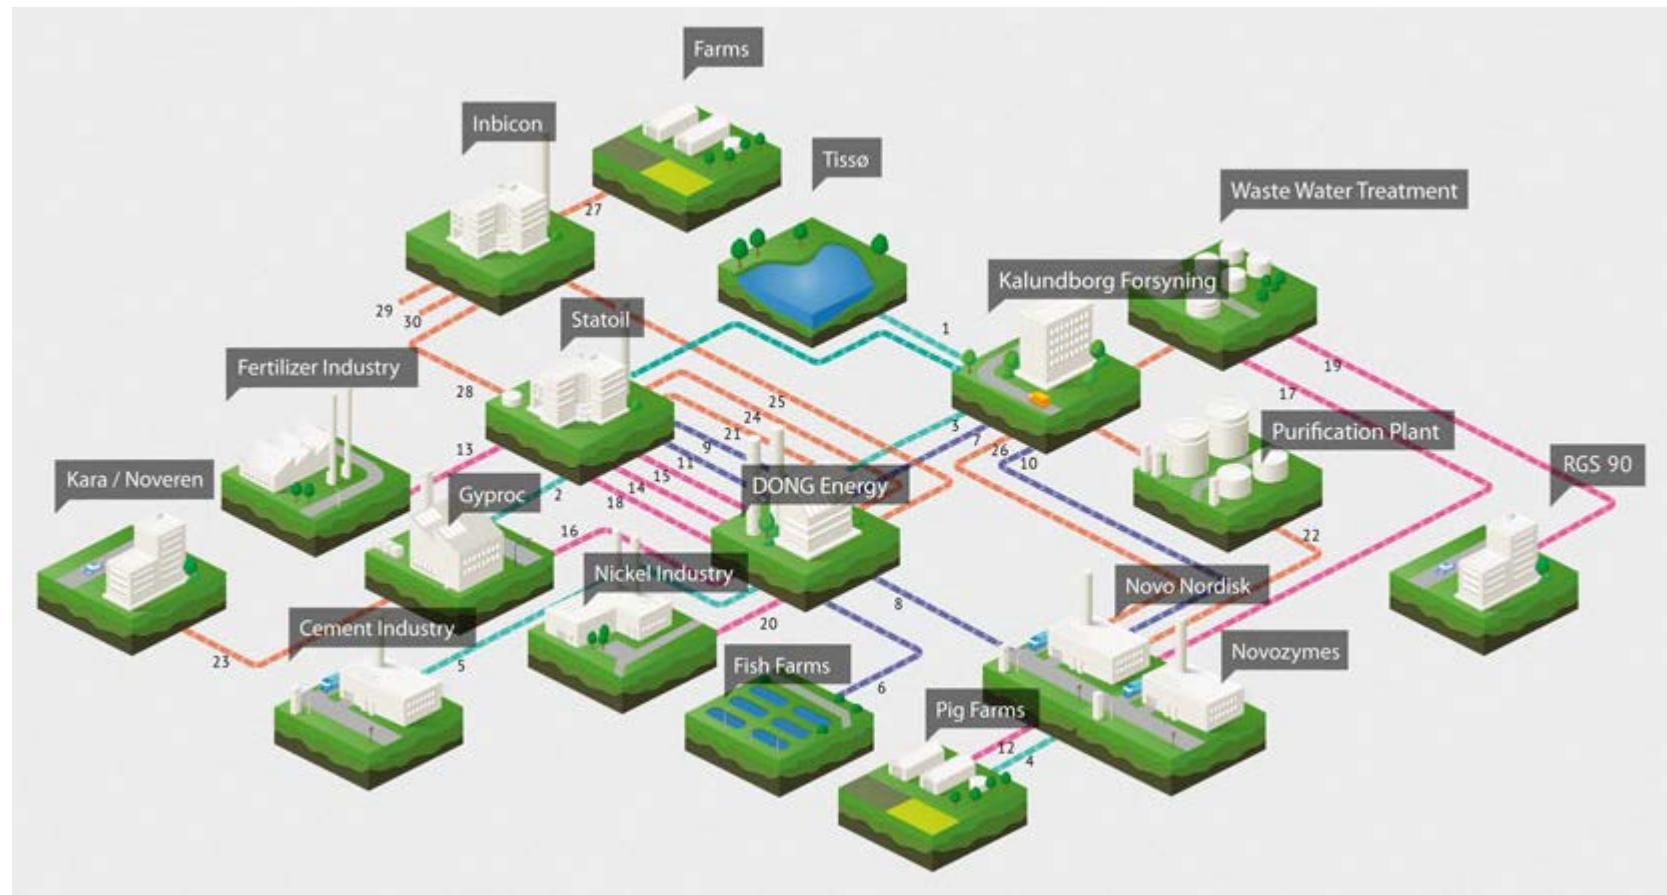

Modelo de simbiosis territorial/industrial: Kalundborg modelo

1961-1979

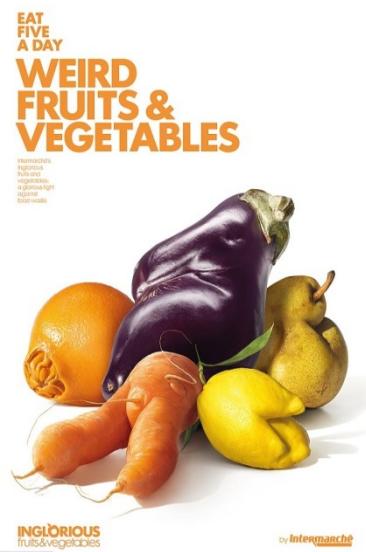

III. Ejemplos concretos

Modelo de simbiosis territorial/industrial: Kalundborg modelo 2000-2010

III. Ejemplos concretos

El sector alimentario

III. Ejemplos concretos

El sector de la construcción

IV. El Circular Europe Network

IV. El Circular Europe Network

Directrices generales para la planificación de la economía circular

Clarificación de la economía circular:

- Conceptos básicos y objetivos
- Principios que fundan estrategias de economía circular
- Áreas clave de intervención

La economía circular en práctica:

- Primeros pasos para una estrategia de economía circular
- Instrumentos, medidas intersectoriales y temáticas
- Hoja de ruta y monitoreo

GENERAL GUIDELINES FOR INTEGRATED
CIRCULAR ECONOMY STRATEGIES AT
LOCAL AND REGIONAL LEVEL

ACR+ report, May 2015

Brussels Regional Programme for a Circular Economy

Action leader(s)

1 Brussels Environment; 2 Impulsa

Summary

The objective of the Brussels Regional Programme for a Circular Economy (PRBC) is to promote the transition towards a circular economy. This means to move away from a linear economy of creating waste to obtain a durable value as a resource for the Brussels Capital Region.

You are logged in as Philippe Mathieu Haubot

Governance of the circular economy strategy

Main documents on circular economy (in French)

- 2013 strategy for revitalising the economy of the Brussels Region (2013)
- Urban metabolism of the Brussels Capital-Region (2013)
- Circular economy: concepts for the Brussels Capital-Region. Living in harmony with our planet (2013)
- Brussels Environment's contribution towards a circular economy in Brussels (2013)
- Evaluation of the Employment-Environment Alliance (2010-2014)

Conclusions and recommendations of an evaluation study of the Employment-Environment Alliance (Employ-Environment – AEE), implemented during the previous legislative period (2009-2014), are oriented towards this objective. In fact, the PRBC dynamics stems from the Employment-Environment Alliance, a sectorial policy launched by the Brussels Government in 2010 and which aims at improving the framework conditions for economic development and environmental improvement as a source for economy and employment creation opportunities for Brussels. For four years now the Employment-Environment Alliance has supported the development of four key sectors: sustainable construction since February 2011, water since November 2012, resources and waste since October 2013 and sustainable food systems since December 2013.

The Alliance's methodology includes various phases and is iterative:

The mobilised stakeholders include private professional federations, private and university research centres, trade unions, as well as public stakeholders active in the areas of environment, economic stimulation, research, insertion, education, training, etc.

2010-2014

Going beyond sectorial economic advisory, in 2013 the Brussels Capital-Region carried out an urban metabolism study, i.e. a review of processes through which the Region mobilises, consumes and transforms natural resources.
