NATURAL CAPITAL SUMMIT

01. ANTECEDENTES

NATURAL CAPITAL COALITION

DRAFT FOR CONSULTATION

NATURAL CAPITAL PROTOCOL

IMPORTANT: please read

The Natural Capital Protocol has been developed for business. It is aimed at managers from sustainability, environment, health and safety and operations departments to help them to integrate natural capital into existing business processes. In order to engage other audiences, the Coalition and its members intend to develop other documents and approaches that will be relevant to them, e.g. a short guide for senior leaders.

v0 (version zero) of the Protocol is an early draft, and is not complete. As we work towards a final version in July 2016, we welcome your involvement through a consultation to improve and strengthen the Protocol and fill gaps. The consultation will run until 26 February 2016.

To find out how to take part visit: <http://www.naturalcapitalcoalition.org/consultation>.

We will be accepting comments through an online collaboration system called Collaborate. This will mean all comments are attributable and will provide a record of responses. This will also help to align the consultation with our ongoing business piloting program.

Guidance is provided to help you add, reply and vote on comments. In addition, we will include specific questions on which we would like your opinion.

Following the consultation, we will provide feedback, sharing overall responses to the comments received and setting out the main challenges and areas for improvement.

We look forward to your involvement in this important phase of the development of the first global Natural Capital Protocol.

Draft 23 November 2015 **Version 0.0**

The EU Business @ Biodiversity Platform: Phase 2

[Join the EU B@B Platform](#)

The European Business and Biodiversity (B@B) Platform provides an EU level forum for sustained and strategic dialogue about the links between business and biodiversity. Through three separate thematic workstreams, the Platform delivers tangible results by working with business to develop tools and approaches that integrate biodiversity considerations into business practice. The B@B Platform also helps to coordinate and to raise awareness of innovative national and international initiatives, and showcase business best practices at EU level. Look at [the different types of memberships](#) and the [multiple benefits](#) you can reap from the B@B Platform.
