Are you part of a **sustainable** initiative in the **agri-food sector**?

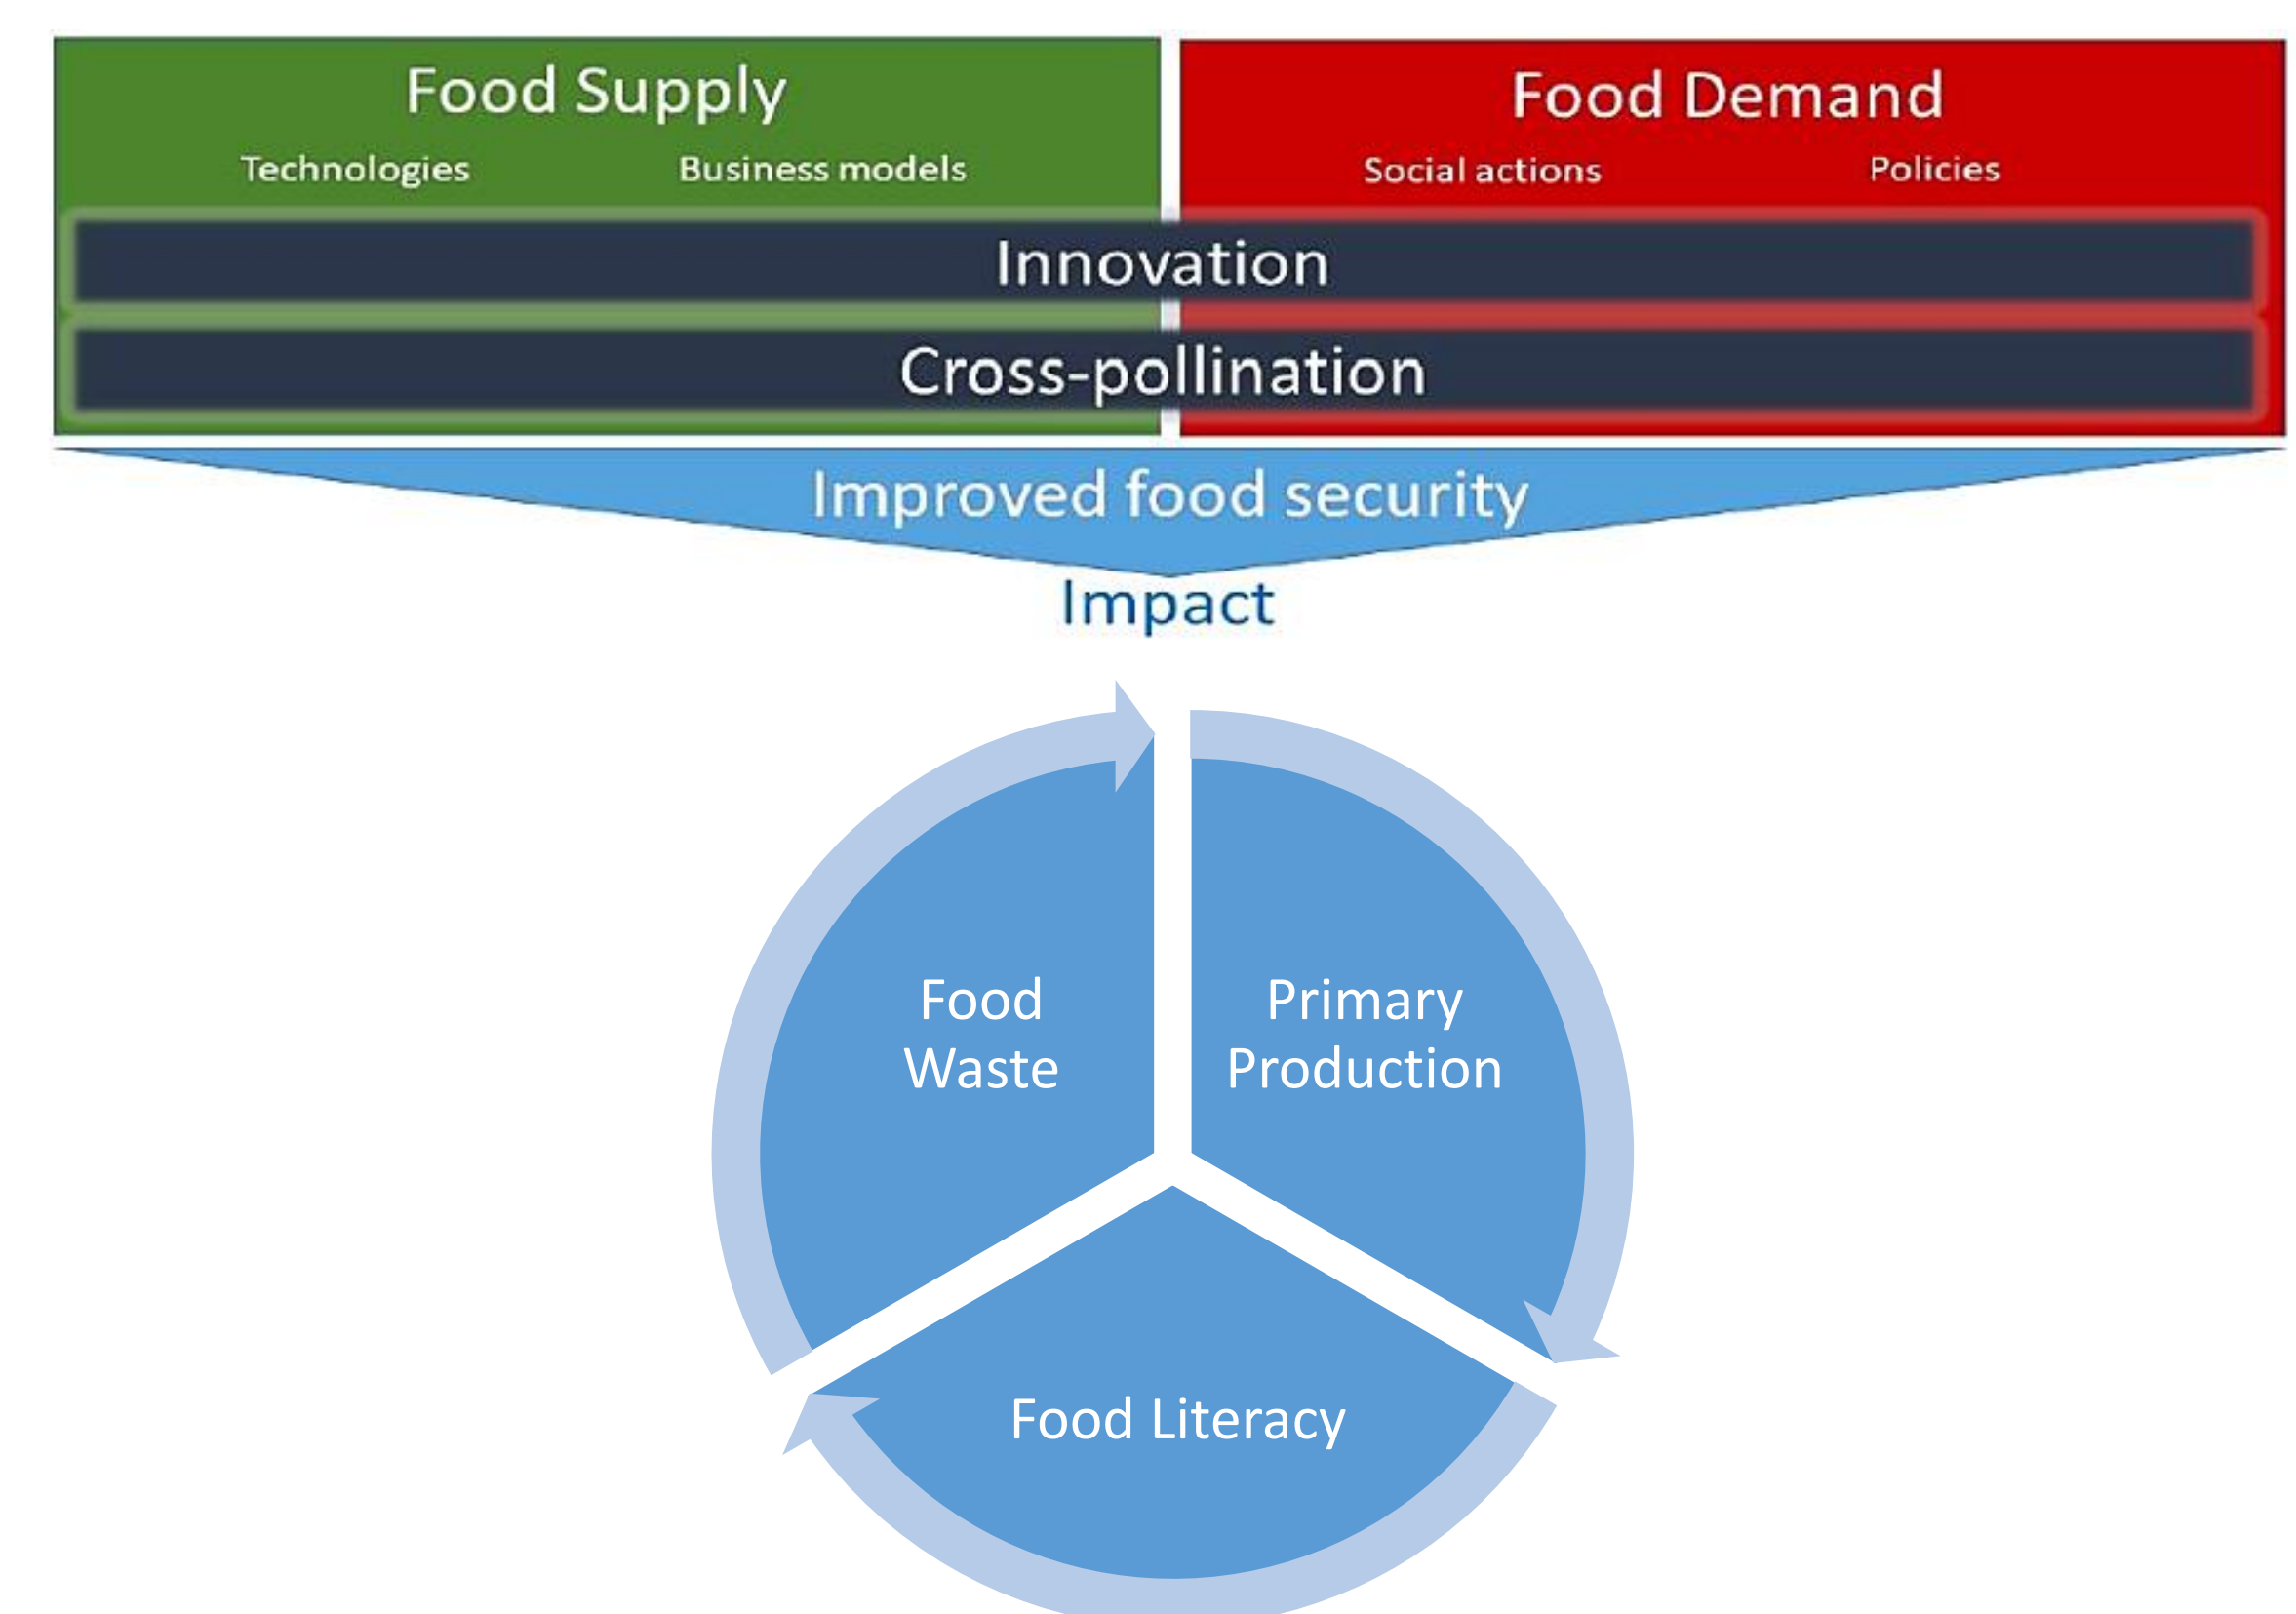

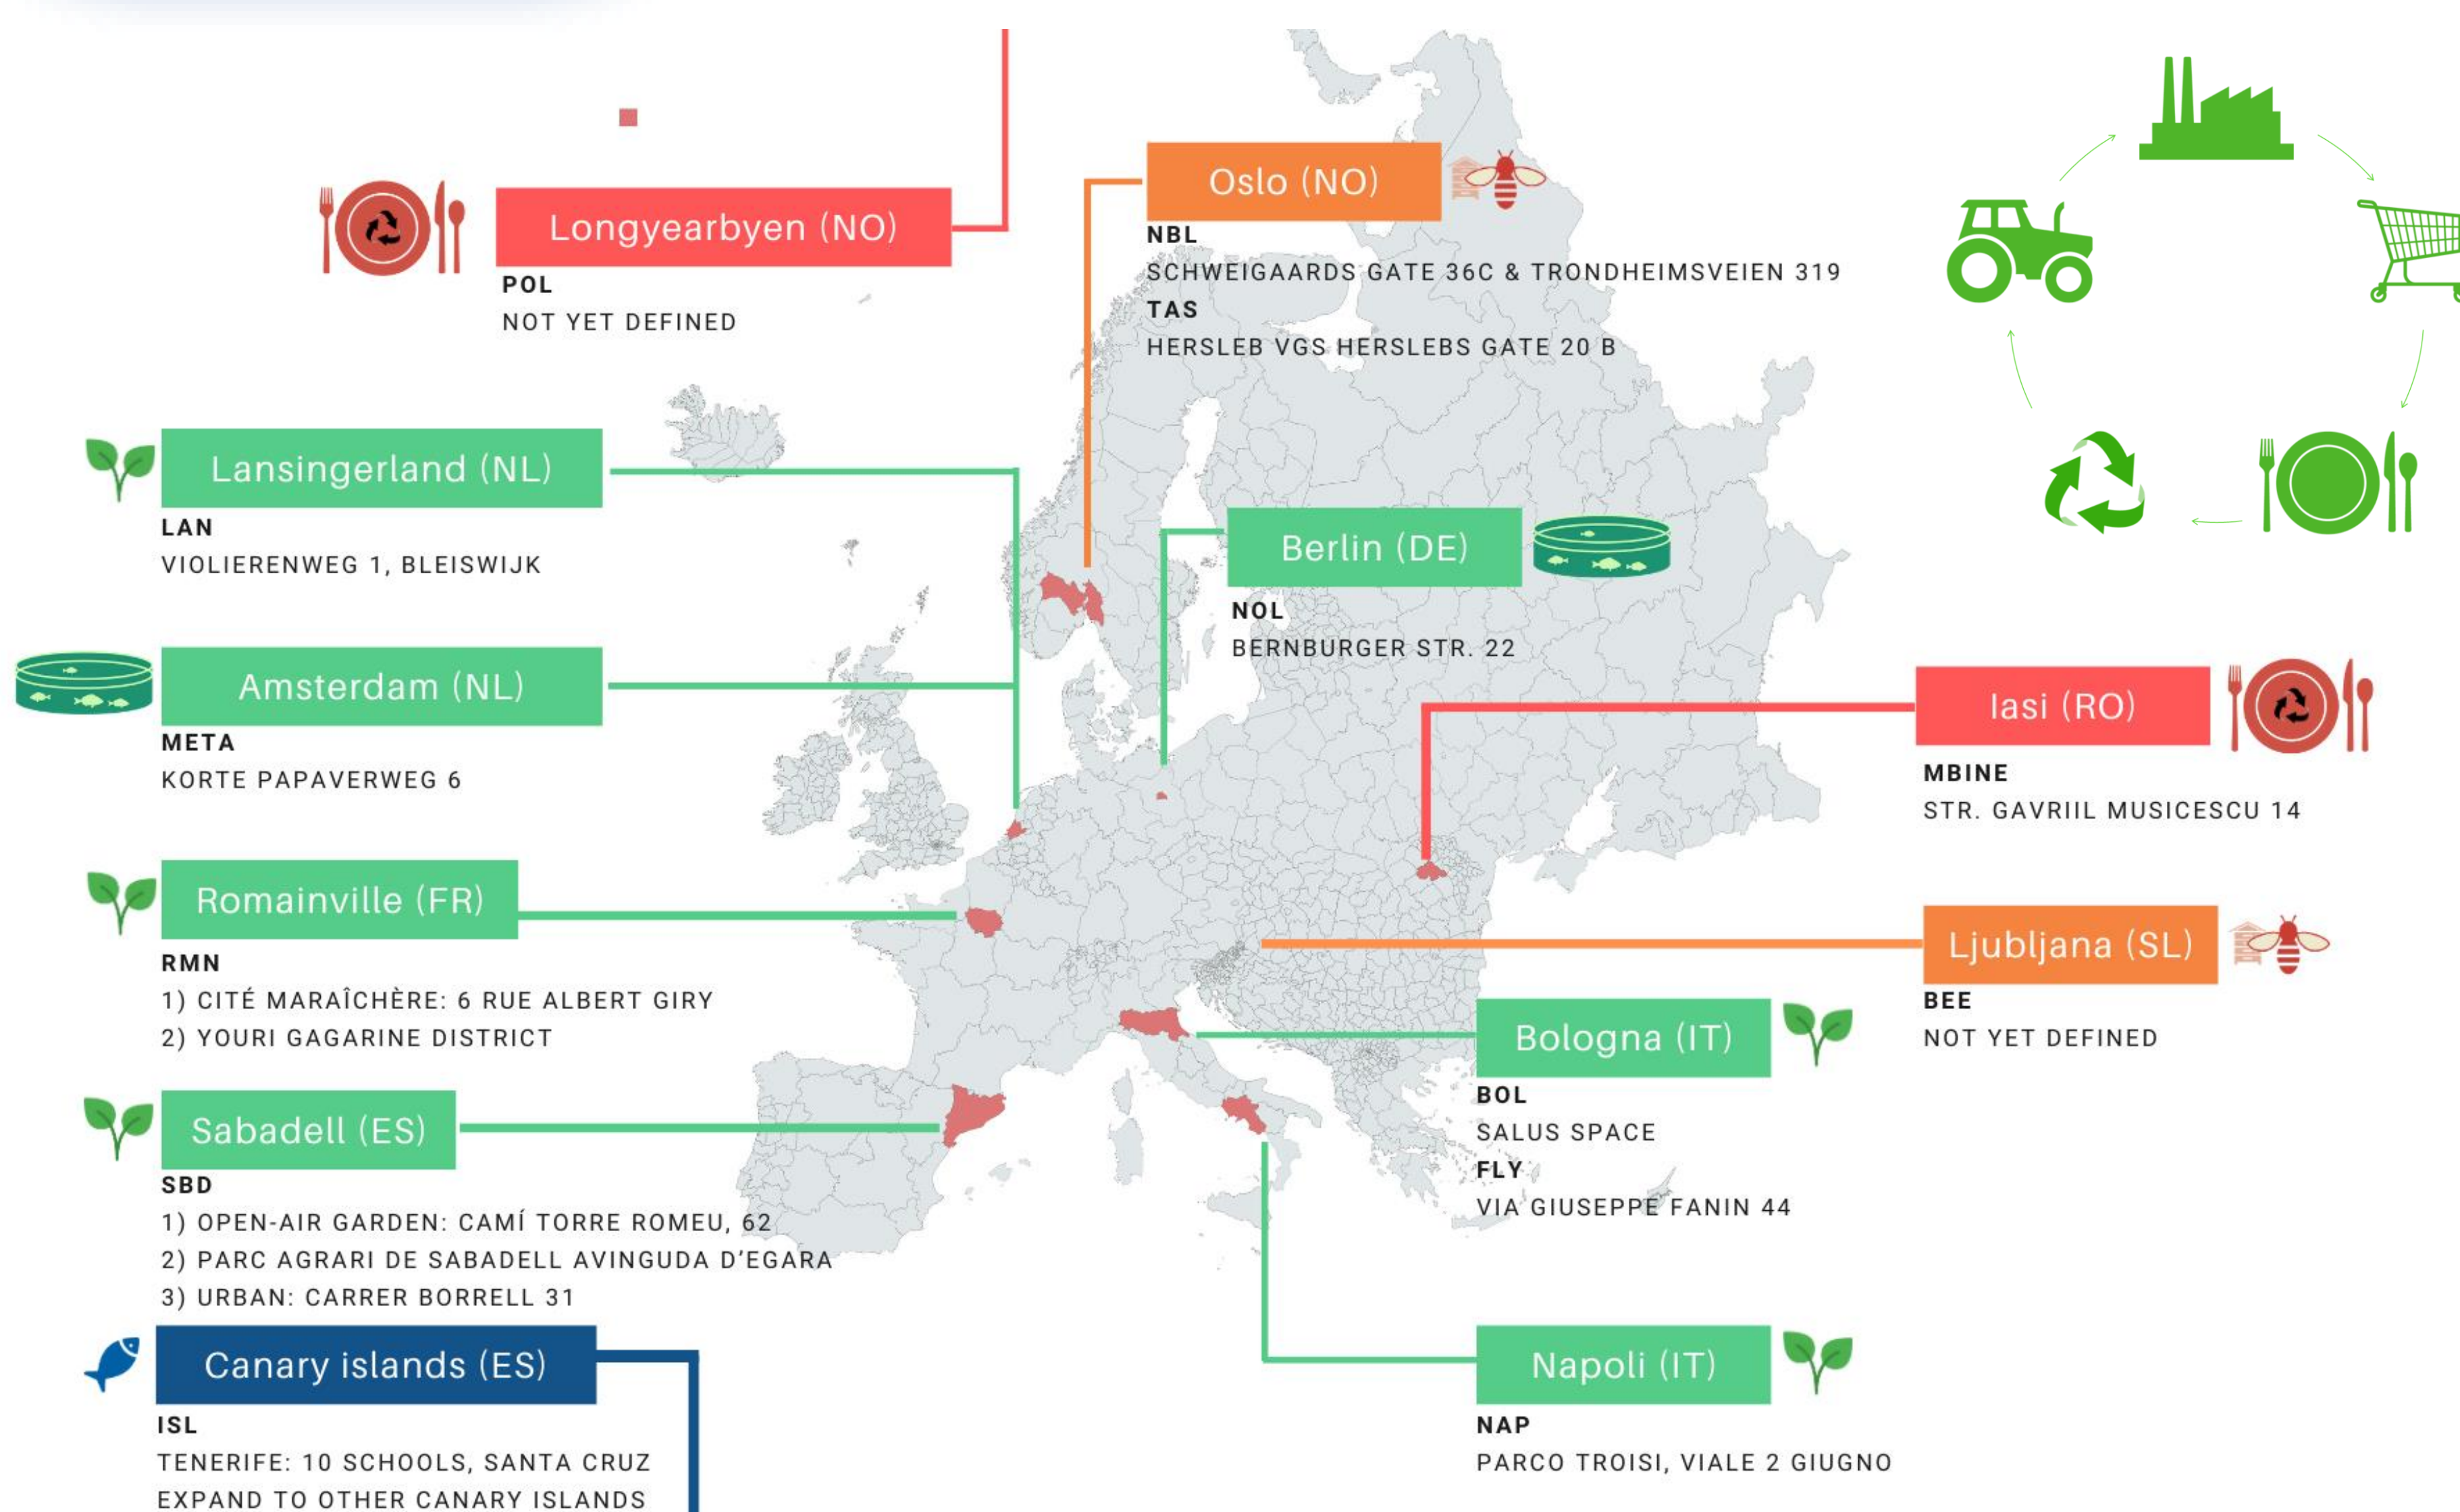

Do you want to be involved in an important European project and contribute to the creation of a more **sustainable food system**?

Let's give your contribution by filling out the **online survey** .

The survey takes less than 20 minutes and will offer many opportunities for your organization.

“Think globally, act locally”
fostering the complex network between urban, peri urban and rural areas among all the *“actors, processes and relationships to do with food production, processing, marketing, and consumption that exist in a given geographical region”*¹

Project funded by **HORIZON 2020**, 24 partners, 8 European countries (France, Germany, Italy, Netherlands, Norway, Romania, Slovenia and Spain), led by Alma Mater Studiorum University of Bologna
