

# BioICEP

Bio Innovation of a Circular Economy for Plastics

## A SUSTAINABLE WAY TO A BETTER WORLD

**BioICEP** is designed to biotransform plastic waste into new sustainable ready to use plastics. The BioICEP team will operate a series of innovative technologies to take in mixed plastic waste at one end, treat it with microbes and enzymes, recovering the molecules and bioprocessing them to produce new replacement bioplastics and bioproducts.

MIXED PLASTIC WASTE

TRIPLE ACTION  
DEPOLYMERISATION

MONOMER RECOVERY

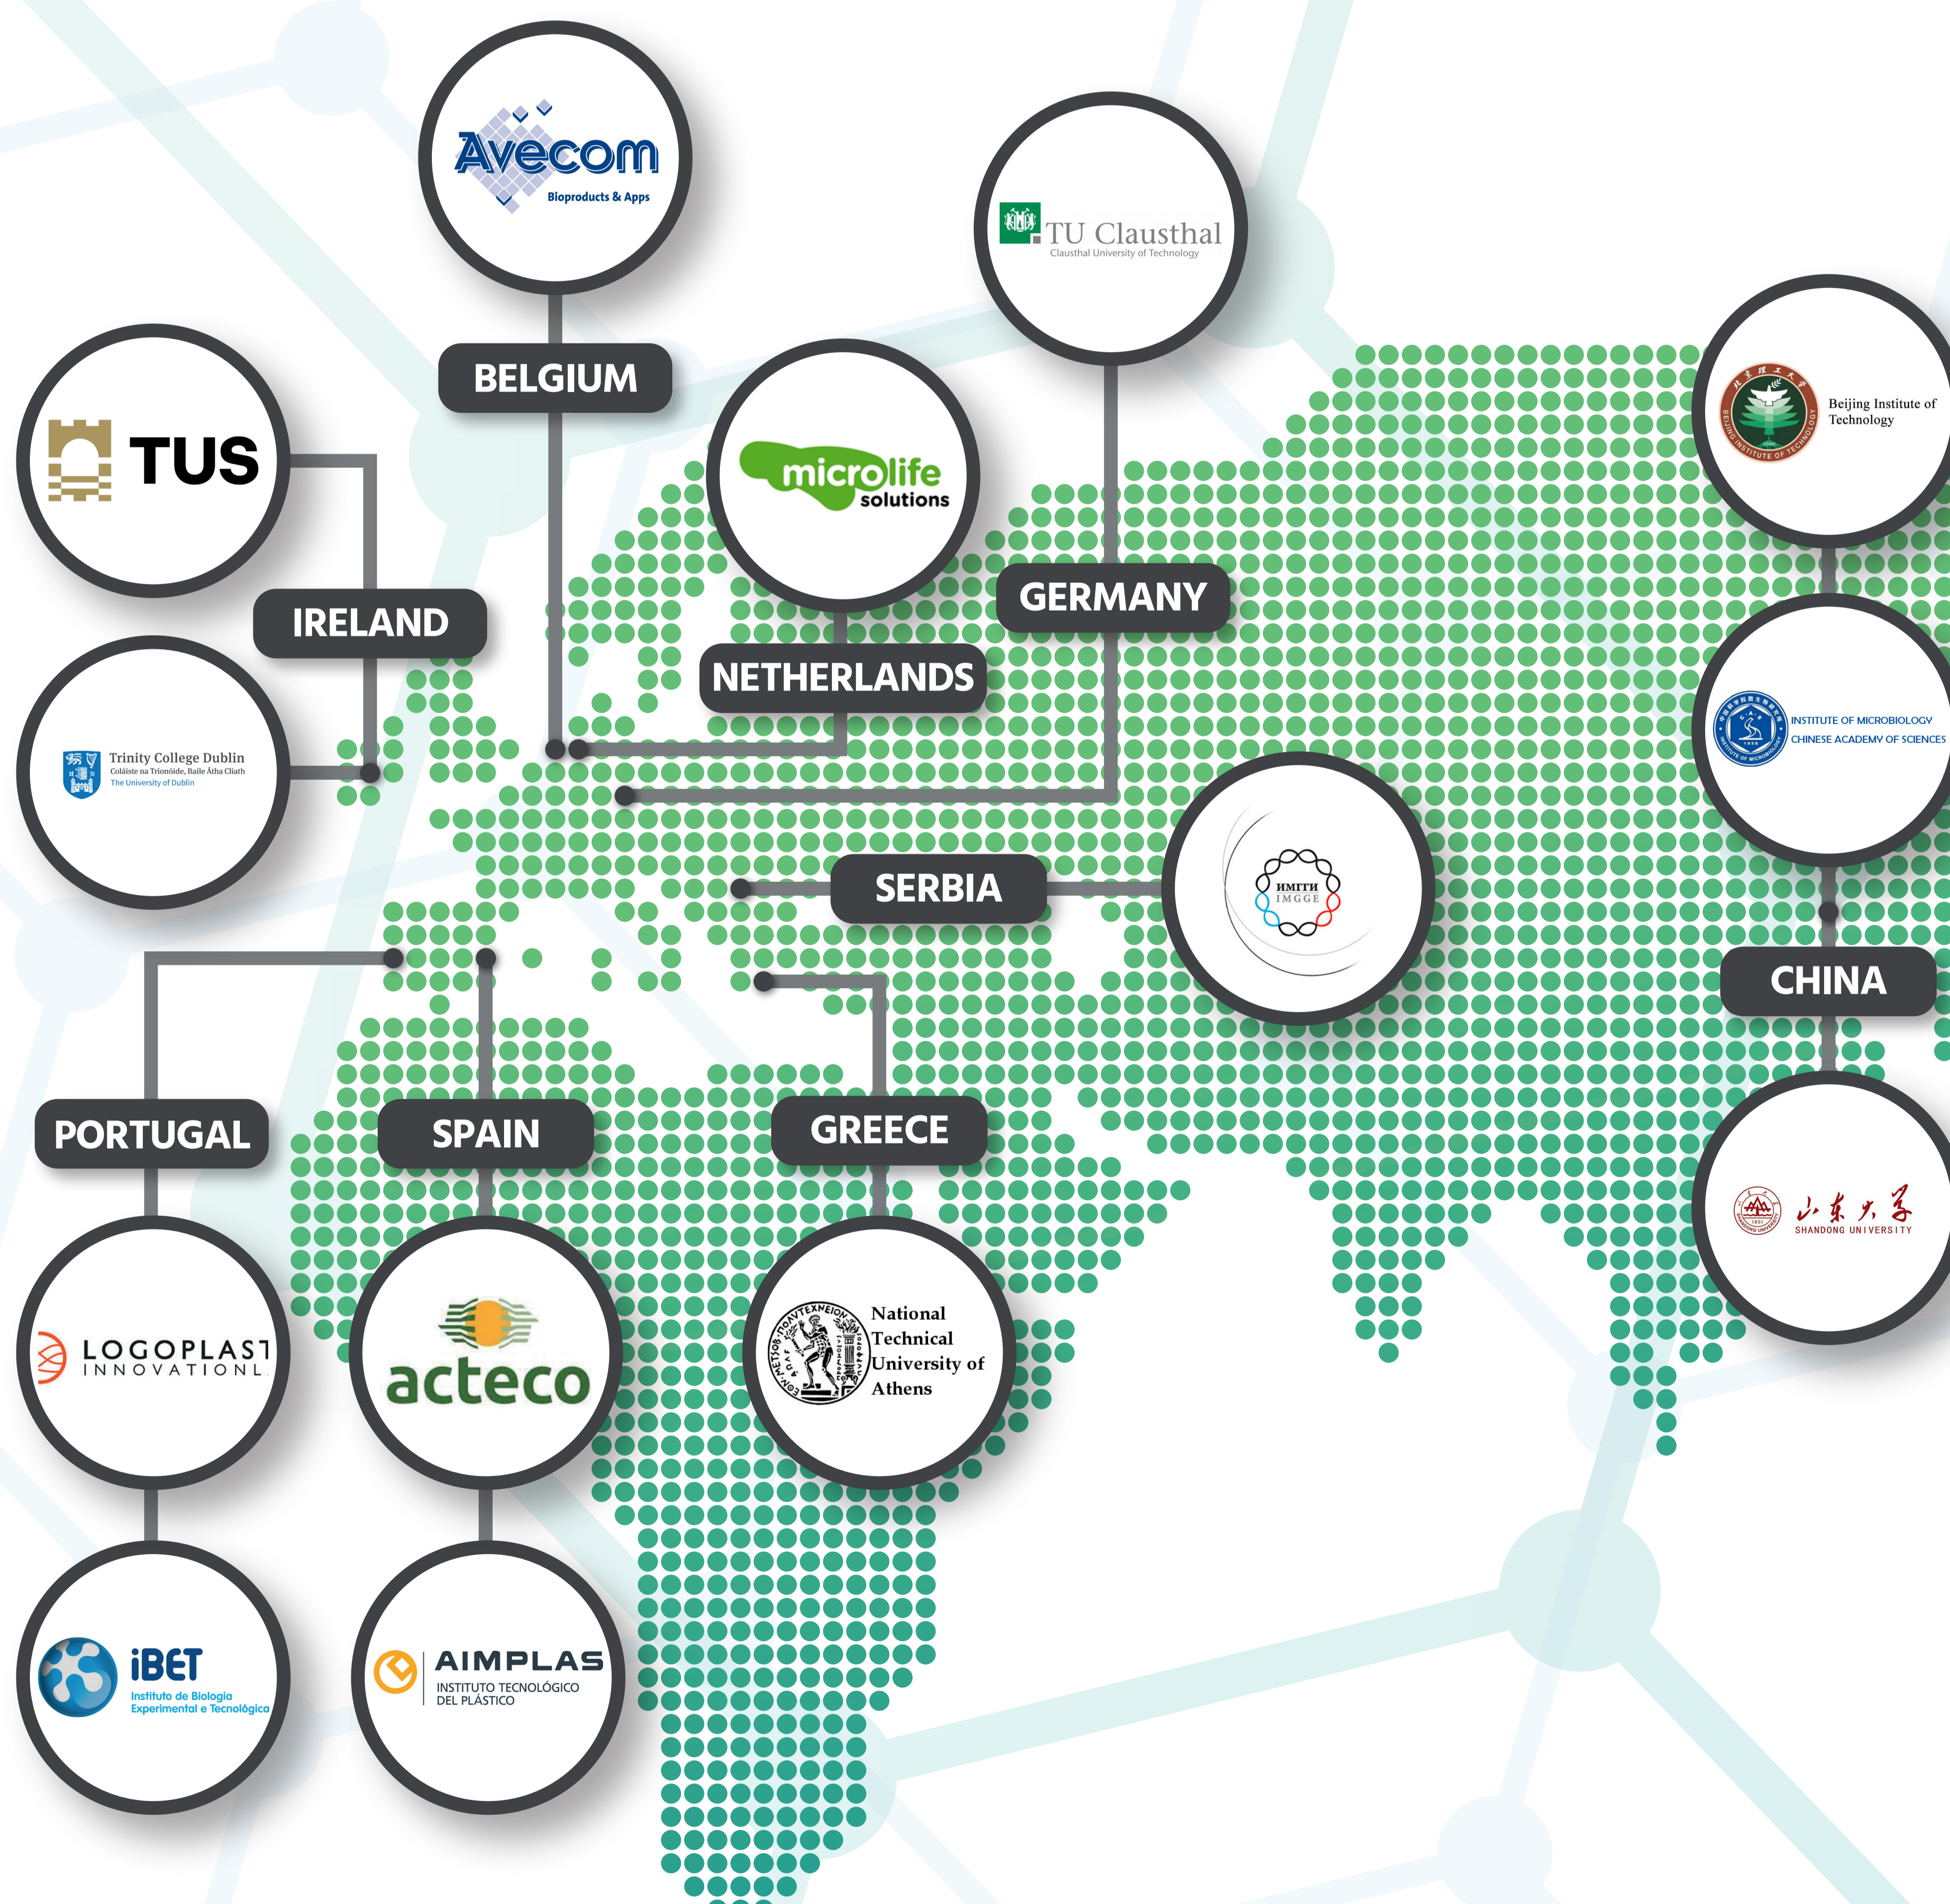

FERMENTATION

PHB  
NANOCELLULOSE  
RHAMNOLIPIDS

BIOPLASTICS  
& BIOPRODUCTS
