ROBOCOOP-EU

CIRCULAR BIOECONOMY BUSINESS MODELS OWNED BY AGROCOOPERATIVES

ROBOCOOP-EU will: involve 8 actors of the primary sector in the establishment of biobased value chains; avoid 25-30% of GHG emissions by means of supply chain and logistic optimisation; design 1 zero-waste multi-feedstock biorenery at industrial scale (based on existing processes for biocompounds extraction and 2nd streams valorisation); validate 17 new products (3 food formulations, 3 feed additives, 5 cosmetics and nutraceutics, 1 plasticiser and 5 biofertilisers). In order to achieve a successful implementation of the business models in its 3 regional hubs (Extremadura, Apulia and Western Macedonia), ROBOCOOP-EU will integrate multidisciplinary knowledge by developing co-creative spaces called "Living Labs", where partners and stakeholders will discuss and validate the most consensual pathway towards sustainable and protable co-participated biorenery and seek for public and private fund scheme workable scenario. ROBOCOOP-EU consortium is composed by 20 multisectorial partners, specically designed to cover the entire bio- based value chain in non-competitive and complementary position, which in turn will ensure an effective dissemination and exploitation of results.
